

Console Connect IoT – Service Coverage

Effective from: 1st August, 2022

CONSOLE CONNECT IOT – Service Coverage (effective from 1st August 2022)

1. This is a live document for sales purpose.
2. This document is updated from time to time to provide the countries or destinations where the Service will be provided to Customer and/or Users via the local mobile operators or mobile service providers
3. There may be one or more than one service provider in each country or destination, subject to the actual service availabilities. Without prior notice, PCCW Global has the right to add, change or remove local service provider in any one of these countries or destinations.
4. Actual provided services are subject to the actual support of mobile technologies, frequency bands and coverage locations of individual local mobile networks. Customer has the responsibility to ensure their devices comply to the local services requirements at all times.
5. All services are provided for M2M purpose only
6. Services are governed by PCCW Global MSA and CCIoT Specific Terms and Conditions
